ABOUT

Leaf, place *and exact measure.*

We source loose-leaf tea from the mountain provinces of China. Each tea carries its origin with coordinates, its ingredients, and a brewing spec: temperature, dose, time, number of infusions and vessel. No hyperbole — only what can be measured and tasted in the cup.

BREWING

How to brew

Warm the vessel with boiling water. Add the dose of leaf, pour water at the right temperature and hold for the stated time. Most teas reward several short infusions — the flavour unfolds gradually.

VESSELS

蓋碗

Gaiwan

Lidded bowl for gongfu infusions of oolong and green.

茶壺

Teapot

For herbal infusions and larger pours.

杯

Cup

For instant cha gao paste.
